**Health and Wellness in Antiquity through the Middle Ages** William H. York, 2012-08-17 Early medical practices are not just a historical curiosity, but real stories about people and health that may teach us much about the 21st century. This intriguing volume offers a comparative examination of early medicine and health care in regions as varied as ancient Mesopotamia, Egypt, Greece, Rome, India, China, the Islamic world, and medieval Europe. *Health and Wellness in Antiquity through the Middle Ages* compares and contrasts health-care practices in seven different cultures from around the world. In considering the range of medical practitioners in each society, and the kinds of health care they provided, it examines the

development of a written medical tradition, the methods of medical education, the practice of surgery, and the theories and practices of pharmacy. Other topics include the application of medicine in specific contexts, such as the treatment of women, children, and those with mental illness. Another important theme explored is the impact of religion and state institutions on the development, implementation, and results of medical care as experienced by real people in real life. Throughout, the book offers an international historical perspective, which allows for greater comparative and critical understanding of how different cultural beliefs influenced the development and management of health care.

**Rendang, Minang Legacy to the World** Reno Andam Suri, 2015 Rendang content gained good recognition from Gourmand Prize Award in Beijing. Thoroughly researched but written casually, *Rendang: Minang Legacy to the World* boasts a beautiful presentation of the dishes as well as the landscape of West Sumatra. Reno has become the media go-to source for rendang. It ultimately lays the groundwork about the origins of rendang and its philosophical approach, but it also explains that ultimately there are so many other varieties other than the one we usually have in Padang restaurants. Reno Andam Suri dreamed of promoting rendang to a wider audience by introducing vacuum-packed rendang suitable for air travel. She did not stop there, however. In 2012 she started a blog, *Rendang Traveler*, to share stories about rendang, the proud dish from her homeland, West Sumatra. To write this book, she returned to West Sumatra, and discovered the rich philosophical and cultural values of rendang, affirming her view that it is indeed a national treasure worth sharing with the world. At her Baralek Rendang (rendang festival) she introduced rendang to an appreciative public through cooking demonstrations, engaging stories, and interesting games. Reno has appeared in many discussions about West Sumatran cuisine, and has conducted various cooking workshops and training sessions. She is also involved in many educational communities such as Indonesia Mengajar and Kelas Inspirasi. Today, she organizes educational trips or travel programs to West Sumatra, which highlights the region's rich culture and culinary delights. She invites participants to become better acquainted with the daily lives of West Sumatrans. She dreams of promoting rendang to an even wider audience, not just as a delectable dish, but also for the wealth of amazing stories behind it, as part of an enduring culture.

*Anaerobic Sludge Digestion* Water Pollution Control Federation. Task Force on Anaerobic Sludge Digestion, 1987

Papa's Day Justin Kase, 2013-10 From 1982 to 1986, an enterprising college student financed his education by selling over 600 sperm 'donations' to fertility clinics up and down the eastern seaboard. Twenty years later, Walt Callisto, who grew

up as an only child on a rutabaga farm in upstate New York, suddenly discovers that he has 376 brothers and sisters. His search for his sperm daddy turns up a shady thoroughbred horse owner who stores frozen horse semen in his garage, traffics in hot boat motors, and maintains his Lincoln town car with parts appropriated from rental cars. Then Walt's life begins to get a little strange...

**Evidence-Based Policymaking** Karen Bogenschneider, Thomas Corbett, 2021-04-27 New thinking is needed on the age-old conundrum of how to connect research and policymaking. Why does a disconnect exist between the research community, which is producing thousands of studies relevant to public policy, and the policy community, which is making thousands of decisions that would benefit from research evidence? The second edition updates community dissonance theory and provides an even stronger, more substantiated story of why research is underutilized in policymaking, and what it will take to connect researchers and policymakers. This book offers a fresh look into what policymakers and the policy process are like, as told by policymakers themselves and the researchers who study and work with them. New to the second edition: • The point of view of policymakers is infused throughout this book based on a remarkable new study of 225 state legislators with an extraordinarily high response rate in this hard-to-access population. • A new theory holds promise for guiding the study and practice of evidence-based policy by building on how policymakers say research contributes to policymaking. • A new chapter features pioneering researchers who have effectively influenced public policy by engaging policymakers in ways rewarding to both. • A new chapter proposes how an engaged university could provide culturally competent training to create a new type of scholar and scholarship. This review of state-of-the-art research on evidence-based policy is a benefit to readers who find it hard to keep abreast of a field that spans the disciplines of business, economics, education, family sciences, health services, political science, psychology, public administration, social work, sociology, and so forth. For those who study evidence-based policy, the book provides the basics of producing policy relevant research by introducing researchers to policymakers and the policy process. Strategies are provided for identifying research questions that are relevant to the societal problems that confront and confound policymakers. Researchers will have at their fingertips a breath-taking overview of classic and cutting-edge studies on the multi-disciplinary field of evidence-based policy. For instructors, the book is written in a language and style that students find engaging. A topic that many students find mundane becomes germane when they read stories of what policymakers are like, and when they learn of researcher's tribulations and triumphs as they work to build evidence-based policy. To point students to the most important ideas, the key concepts are highlighted in text boxes. For those who desire to engage policymakers, a new chapter summarizes the breakthroughs of several researchers who have been successful at driving policy change. The book provides 12 innovative best practices drawn from the science and practice of engaging policymakers, including insights from some of the best and brightest researchers and science communicators. The book also takes on the daunting task of evaluating the effectiveness of efforts to engage policymakers around research. A theory of

change identifies seven key elements that are fundamental to increasing policymaker's use of research along with evaluation protocols and preliminary evidence on each element.

**Iconicity** Troels Degn Johansson, Martin Skov, Berit Brogaard, 1999 The concept of iconicity has been pivotal in a new interest taken in semiotics over the recent years. Not only as an abstract notion of the fundamental possibility in general semiotics, that is of firstness as its originator Charles Sanders Pierce has it, but also as a key concept for the particular semiotic understanding of the logical interrelations between the world and cognition, and of course between the world and its images. In the wake of the interest, it has finally become possible to speak openly in semiotic circles of the obvious iconic aspects of semiosis.

Nomads who Cultivate Beauty Mette Bovin, 2001 The author describes Wodaabe cultural choices as active archaisation. Different art forms are analysed in the light of identity construction by the Wodaabe. Their elaborate cultivation of beauty in make-up, tattoos, body paintings, calabash carvings, embroideries, and architecture all follow the principle of symmetry and order in the cosmos. The author emphasizes the gendered aspects of social life and identity construction and explores masculinity among nomadic Wodaabe men, who are living sculptures displaying their beauty as a spiritual act, full of honour and dignity.--BOOK JACKET.

At that time, according to the legend, a great king will emerge from this sanctuary to defeat the forces of evil and establish a golden age. Drawing on Tibetan and Sanskrit texts, interviews with lamas in Nepal and India, and his own experiences in the Himalayas, Edwin Bernbaum gives a detailed account of this intriguing legend, examining its basis in the history and religion of the region, as well as exploring its symbolic meaning. -- from publisher description.
