Pictured Glossary in Biology Prof. Amal Attia El-Morsy Ibrahim,2017-01-01 The glossary continues to be a valuable guidance tool for biological students those studying biology either in High Schools or Science Colleges as well as scientific researchers. Everything you need for learning biological terminology is right in your hands. The language of biology is rigorous. It is among the great tools of the mind for a better understanding and more accurate network between all biologists of the life sciences.The lists of prefixes, suffixes and terms arranged alphabetically, which lets students look terms up even if they are not sure about their exact spellings. It provides comprehensive coverage of biology, and biochemistry entries on key scientists.This glossary will contain 8000 scientific words expressing all biology branches (Zoology, Botany & Microbiology).

The number of the glossary in this book is more than that found in Oxford Dictionary.

Molecules That Amaze Us Paul May, Simon Cotton, 2014-10-23 This new book is by two knowledgeable and expert popularizers of chemistry and deals exclusively with molecules and compounds rather than with the simpler atoms and elements. It is based on the very successful 'Molecule of the Month' website that was begun by Paul May fifteen years ago and to which his co-author Simon Cotton has been a frequent co

The Cholesterol Puzzle Jill D Davey, 2017-09-28 This book gives you a new angle on the word 'cholesterol'. It explains how the heart functions and what really causes heart disease. You will learn how to treat it, prevent it and, importantly, how to resolve it... naturally.

Nonprescription Product Therapeutics W. Steven Pray, 2006 When it comes to helping customers make wiser and safer choices in their use of over-the-counter treatments, the pharmacist's best source of information is *Nonprescription Product Therapeutics*. This text emphasizes the pharmacist's role in triage--assessing the best nonprescription products for a client and knowing when medical conditions warrant a referral to another health professional. Organized by condition rather than by drug, the text is easy to consult, and complements a disease-based approach to therapeutics. Pharmacists will find useful information on ingredients, interactions, contraindications, and other essentials for helping customers choose appropriate nonprescription products. The Second Edition contains additional charts, drawings, illustrations, and tables. The book includes decision-making algorithms, case studies, patient counseling tips, and warnings on dangerous or life-threatening ingredients, actions, or situations. Another unique feature of this text is *A Pharmacist's Journal*--real-life reports from the front lines by an award-winning professor and researcher with over twenty years of experience in retail community pharmacy.

The Aquariums of Pyongyang Chol-hwan Kang, Pierre Rigoulot, 2005-08-24 Part horror story, part historical document,

part memoir, part political tract, one man's suffering gives eyewitness proof to an ongoing sorrowful chapter of modern history.

Hemolytic Anemia ,

The Aquariums of Pyongyang Kang Chol-Hwan, Pierre Rigoulot, 2012-12-01 'I beseech you to read this account' - Christopher Hitchens A magnificent, harrowing testimony to the voiceless victims of North Korea. Kang Chol-Hwan is the first survivor of a North Korean concentration camp to escape the 'hermit kingdom' and tell his story to the world. This memoir reveals the human suffering in his camp, with its forced labour, frequent public executions and near-starvation rations. Kang eventually escaped to South Korea via China to give testimony to the hardships and atrocities that constitute the lives of the thousands of people still detained in the gulags today. Part horror story, part historical document, part memoir, part political tract, this story of one young man's personal suffering finally gives eye-witness proof to this neglected chapter of modern history.

API Textbook of Medicine Yash Pal Munjal,

Mammalian Sterols Damjana Rozman, Rolf Gebhardt, 2020-08-10 This book provides a comprehensive description of sterols and their novel biological roles in mammalian signaling, the book covers their biosynthesis and structure, describes sterol receptor-mediated actions, their tissue distribution and their role in disease. It offers insight into new research findings, focusing specifically on novel discoveries in bile acid and oxysterol signaling, including the lanosterol-to-cholesterol intermediates. Special attention is paid on the sex distribution of these sterols (male or female) and their sexually dimorphic roles in mammalian species, such as human, rat and mouse. Since sterols and drugs (xenobiotics) use many identical receptor-mediated signaling pathways, the book will be interesting for researchers working on the cross-road of endogenous and xenobiotic metabolism, it is intended for advanced students and scientists in molecular biology and biochemistry as well as for medical doctors in hepatology.

Freedom without Justice Chol Soo Lee, 2017-06-30 Freedom without Justice is the compelling story of Chol Soo Lee's wrongful imprisonment and his years of survival in prison, while political activists fought to win his freedom. His saga took place against a backdrop of great historical change in Asian American communities following the passage of the 1965 Immigration Act. In 1973, less than a decade after he immigrated to the United States from Korea at the age of twelve, Lee is convicted of murder and given a life sentence. Four years later, his case became a nationwide rallying point for an extraordinary pan-Asian American movement during the late 1970s and early 1980s, bringing together people from a broad spectrum of social backgrounds for a common political cause. This diverse grassroots activism organized a six-year "Free Chol Soo Lee!" campaign that led to his release from San Quentin's Death Row in 1983. While the case inspired newspaper headlines, TV specials, and even a Hollywood movie, until now the full story has never been told in Chol Soo Lee's own voice.

Freedom without Justice reveals the race and class dimensions of US correctional institutions from the perspective of convicts who fiercely refuse to be victims. As a chronicle of the life of a youth at risk, during a time when Asian American inmates were scarce, and Korean Americans even scarcer, Lee's memoir draws readers into a variety of worlds—war-torn Korea, the streets of San Francisco, the criminal justice system, prison gang politics, and death row.

Human Biochemistry and Disease Gerald Litwack,2008-01-08 This textbook is specifically designed for upper-division undergraduate or graduate students in life science or pre-medical majors including dentistry or pharmacology, who are required to take a biochemistry or medical biochemistry course, but who are not necessarily biochemistry majors. The book adopts a unique approach to the topic compared with other biochemistry textbooks currently available, in that each biochemical subject is introduced by a human disease relating the biochemical principles to be developed in that chapter. The goal is to make biochemistry more meaningful to the student who is not normally shown the connection between biochemistry and medicine. * Includes an abundance of figures * Emphasizes human biochemistry * Introduces each chapter with a relevant disease or clinical relationship

The Great Cholesterol Myth Jonny Bowden,Stephen Sinatra,2012-11-01 Heart disease is the #1 killer. However, traditional heart disease protocols--with their emphasis on lowering cholesterol--have it all wrong. Emerging science is showing that cholesterol levels are a poor predictor of heart disease and that standard prescriptions for lowering it, such as ineffective low-fat/high-carb diets and serious, side-effect-causing statin drugs, obscure the real causes of heart disease. Even doctors at leading institutions have been misled for years based on creative reporting of research results from pharmaceutical companies intent on supporting the \$31-billion-a-year cholesterol-lowering drug industry. The Great Cholesterol Myth reveals the real culprits of heart disease, including: - Inflammation - Fibrinogen - Triglycerides - Homocysteine - Belly fat - Triglyceride to HCL ratios - High glycemic levels Bestselling health authors Jonny Bowden, Ph.D., and Stephen Sinatra, M.D. give readers a 4-part strategy based on the latest studies and clinical findings for effectively preventing, managing, and reversing heart disease, focusing on diet, exercise, supplements, and stress and anger management. Get proven, evidence-based strategies from the experts with The Great Cholesterol Myth. MYTHS VS. FACTS Myth-High cholesterol is the cause of heart disease. Fact-Cholesterol is only a minor player in the cascade of inflammation which is a cause of heart disease. Myth-High cholesterol is a predictor of heart attack. Fact-There is no correlation between cholesterol and heart attack. Myth-Lowering cholesterol with statin drugs will prolong your life. Fact-There is no data to show that statins have a significant impact on longevity. Myth-Statin drugs are safe. Fact-Statin drugs can be extremely toxic including causing death. Myth-Statin drugs are useful in men, women and the elderly. Fact-Statin drugs do the best job in middle-aged men with coronary disease. Myth-Statin drugs are useful in middle-aged men with coronary artery disease

because of its impact on cholesterol. Fact-Statins drugs reduce inflammation and improve blood viscosity (thinning blood). Statins are extremely helpful in men with low HDL and coronary artery disease. Myth-Saturated fat is dangerous. Fact-Saturated fats are not dangerous. The killer fats are the trans fats from partially hydrogenated oils. Myth-The higher the cholesterol, the shorter the lifespan. Fact-Higher cholesterol protects you from gastrointestinal disease, pulmonary disease and hemorrhagic stroke. Myth-A high carbohydrate diet protects you from heart disease. Fact-Simple processed carbs and sugars predispose you to heart disease. Myth-Fat is bad for your health. Fact-Monounsaturated and saturated fats protect you from metabolic syndrome. Sugar is the foe in cardiovascular disease. Myth-There is good (HDL) cholesterol and bad (LDL) cholesterol. Fact-This is over-simplistic. You must fractionate LDL and HDL to assess the components. Myth-Cholesterol causes heart disease. Fact-Cholesterol is only a theory in heart disease and only the small component of LP(a) or "bad" LDL predisposes one to oxidation and inflammation.

Herbal and Traditional Medicine Lester Packer, Sissi Wachtel-Galor, Choon Nam Ong, Barry Halliwell, 2004-08-30

Responding to the increased popularity of herbal medicines and other forms of complementary or alternative medicine in countries around the world, this reference reviews and evaluates various safety, toxicity, and quality-control issues related to the use of traditional and herbal products for health maintenance and disease prevention and treatment. With over 3,550 current references, the book highlights the role of herbal medicine in national health care while providing case studies of widely used herbal remedies and their effects on human health and wellness and the need for the design and performance of methodologically sound clinical trials for the plethora of herbal medicines.
