Wheeler, 2018-06-19 Birds of Prey of the West and its companion volume, Birds of Prey of the East, are the most comprehensive and authoritative field guides to North American birds of prey ever published. Written and lavishly illustrated with stunning, lifelike paintings by leading field-guide illustrator, photographer, and author Brian Wheeler, the guides depict an enormous range of variations of age, sex, color, and plumage, and feature a significant amount of plumage data that has never been published before. The painted figures illustrate plumage and species comparisons in a classic field-guide layout. Each species is shown in the same posture and from the same viewpoint, which further assists comparisons. The Fight for the Future: How People Defeated Hollywood and Saved the Internet--For Now Edward Lee, 2013 Wikipedia went dark on January 18, 2012. So did thousands of other websites, including search giant Google, all to protest a controversial copyright bill called the Stop Online Piracy Act (SOPA). The protest even helped to ignite mass demonstrations on the streets of over 250 cities in all 27 countries of the European Union to stop a similar attempt to regulate the Internet under the Anti-Counterfeiting Trade Agreement (ACTA). This book provides a gripping, behind-the-scenes look at how people organized the largest Internet protest in history, plus the largest single-day demonstration in the streets of 27 countries of the European Union. This grassroots movement involving millions of people won an unexpected, but historic first victory in the fight for a free and open Internet.

Don't Trust, Don't Fear, Don't Beg Ben Stewart, 2013-09-10 The true story of Greenpeace activists imprisoned in Russia—and the fight to free them: “A gripping story of tremendous courage that reads like a thriller” (Naomi Klein). “The most important prison motto is hope for the better, but every moment, literally every moment, be prepared for the worst. Don’t hope, don’t fear, don’t beg.” —Roman Dolgov, one of the Arctic 30 With rising temperatures, a military arms race, and a multi-national rush to exploit resources at any cost, the Arctic is now the stage on which our future will be decided. As the ice melts, Vladimir Putin orders Russia’s oil rigs to move further north. But one early September morning in 2013, thirty men and women from eighteen countries—the crew of Greenpeace’s Arctic Sunrise—decided to draw a line in the ice and protest Arctic drilling. Thrown together by a common cause, they are determined to stop Putin and the oligarchs. But their protest is met with brutal force as Russian commandos seize the Arctic Sunrise. Held under armed guard by masked men, they are charged with piracy and face fifteen years in Russia’s nightmarish prison system. Journalist and activist Ben Stewart spearheaded the campaign to release the Arctic 30. Now he tells their astonishing story—a tale of passion, courage, brutality, and survival. With wit, verve, and candor, Stewart chronicles the extraordinary friendships the activists made with their often murderous cellmates, their battle to outwit the prison guards, and the struggle to stay true to the cause that brought them there. “With its colorful dialogue, moral dilemmas, and scenes of physical danger, Stewart’s book would make a great movie . . . the prison life the book reveals is eye-opening, and Stewart describes it with great verve.” —Foreign Affairs

We Are Bellingcat Eliot Higgins, 2021-02-04 _____ THE SUNDAY TIMES BESTSELLER LONGLISTED FOR THE CWA ALCS GOLD DAGGER FOR NON-FICTION _____ 'John le Carré demystified the intelligence services; Higgins has demystified intelligence gathering itself' - Financial Times 'Uplifting . . . Riveting . . . What will fire people through these pages, gripped, is the focused, and extraordinary investigations that Bellingcat runs . . . Each runs as if the concluding chapter of a Holmesian whodunit' - Telegraph 'We Are Bellingcat is Higgins's gripping account of how he reinvented reporting for the internet age . . . A manifesto for optimism in a dark age' - Luke Harding, Observer _____ How did a collective of self-taught internet sleuths end up solving some of the biggest crimes of our time? Bellingcat, the home-grown investigative unit, is redefining the way we think about news, politics and the digital future. Here, their founder - a high-school dropout on a kitchen laptop - tells the story of how they created a whole new category of information-gathering, galvanising citizen journalists across the globe to expose war crimes and pick apart disinformation, using just their computers. From the downing of Malaysia Flight 17 over the Ukraine to the sourcing of weapons in the Syrian Civil War and the identification of the Salisbury poisoners, We Are Bellingcat digs deep into some of Bellingcat's most successful investigations. It explores the most cutting-edge tools for analysing data, from virtual-reality software that can build photorealistic 3D models of a crime scene, to apps that can identify exactly what time of day a photograph was taken. In our age of uncertain truths, Bellingcat is what the world needs right now - an intelligence agency by the people, for the people.

Art And Science Of Managing Public Risks V S Ramamurthy,Dinesh Kumar Srivastava,Shailesh Nayak,2022-04-08 The COVID-19 and the onslaught of Climate Change have exposed the fragility of our lives and ecosystem. Natural disasters like asteroid impact, earthquakes, tsunamis, volcanic eruptions, floods, cyclones, etc., and pandemics like plagues, smallpox, cholera, tuberculosis, malaria, etc., have been man's nemesis from the beginning of time. This list of public risks has now expanded to include pollutions, industrial disasters, and very many new, confusing and emerging technologies.How have governments handled these public risks? How have they convinced people to take precautions under such emergencies? What measures does one take for managing them, and for the rescue, relief, and rehabilitation of the masses? And most importantly, how does one prepare the masses to face the risks without panicking? It is argued that sermons, dictates, and discourses may not work in democratic societies. Rather, one needs a new breed of risk communicators who can enter into a dialogue with the people to prepare them for these challenges and to welcome truly beneficial new technologies.The book takes a panoramic view of the issue of risks and illustrates the challenges and opportunities of the Art and Science of Managing Public Risks. It celebrates the indomitable spirit of man, who has leveraged science to predict — where possible, and provide solutions for managing these risks.

Books I-III Ludger Hovestadt, 2022-12-19 Treatise on digital architecture Hovestadt's treatise strictly follows the model of the famous treatises by Vitruvius (*De architectura*) and Alberti (*De re aedificatoria*), based on the supposition that we find ourselves in a comparable situation today. Vitruvius and Alberti expressed the meaning of architecture in their eras: Roman antiquity and the Renaissance. Hovestadt has done the same for the present day, incorporating considerations of physics, mathematics, technology, literature, and philosophy. Books I to III deal with the role of the architect and the objectivity of architecture. Books IV to VI address the modalities of speaking about and encoding architecture: the secret, the public, and the private. Books VII to X are dedicated to actual digital mechanisms: artificial intelligence, natural communication, gnomonics, and cultural heritage. An architectural treatise for our age in 10 books Inspired by the works of Vitruvius and Alberti Published in three volumes in the Applied Virtuality Book Series

Controversies in Affirmative Action [3 volumes] James A. Beckman, 2014-07-23 An engaging and eclectic collection of essays from leading scholars on the subject, which looks at affirmative action past and present, analyzes its efficacy, its legacy, and its role in the future of the United States. This comprehensive, three-volume set explores the ways the United States has interpreted affirmative action and probes the effects of the policy from the perspectives of economics, law, philosophy, psychology, sociology, political science, and race relations. Expert contributors tackle a host of knotty issues, ranging from the history of affirmative action to the theories underpinning it. They show how affirmative action has been implemented over the years, discuss its legality and constitutionality, and speculate about its future. Volume one traces the origin and evolution of affirmative action. Volume two discusses modern applications and debates, and volume three delves into such areas as international practices and critical race theory. Standalone essays link cause and effect and past and present as they tackle intriguing—and important—questions. When does affirmative action become reverse discrimination? How many decades are too many for a temporary policy to remain in existence? Does race- or gender-based affirmative action violate the equal protection of law guaranteed by the Fourteenth Amendment? In raising such issues, the work encourages readers to come to their own conclusions about the policy and its future application.
