Local Knowledge, Intellectual Property and Agricultural Innovation Michael Blakeney,Kadambot H. M.

Siddique,2020-06-22 This book examines the role of local knowledge in promoting agricultural innovation and legislative support for agricultural innovation through intellectual property laws and the protection of farmers' rights. In assessing the role of intellectual property in promoting agricultural innovation the book examines plant variety rights protection, the patenting of plant varieties and plant breeding methods; gene patents and climate change; open source biotechnology and agricultural innovation and geographical indications and the marketing of agricultural products. As a test bed for the application of the themes of the book, it applies a case study approach to look at the role of local knowledge and intellectual property rights in the cultivation of traditional rice varieties in Kerala, South West India and the extent to which this cultivation is supported by Indian legislation. The book concludes with an examination of the success of self-help groups, such as Farmers' Clubs. This book appeals to all readers interested in policies to promote sustainable agriculture at a time of increasing food insecurity. A special feature of the book is the case study approach. To date, the role of local knowledge and

agricultural innovation has been almost entirely ignored and the role of intellectual property in this space has been largely ignored. The book is a result of a research collaboration between the University of Western Australia and Kerala Agricultural University, funded in part by the Australian Research Council.

Gus Dur Greg Barton, 2002 In October 1999, Abdurrahman Wahid, almost blind and recovering from a nearfatal stroke, was elected as Indonesia's fourth president. Referred to as 'Indonesia's surprising new president' by the Economist, the man who had commanded the highest respect of his fellow countrymen for his lifetime devotion to public service, liberal democracy and tolerant Islam, was impeached in humiliating and controversial circumstances less than two years later. Wise to some, insolent to others, Abdurrahman's mercurial style of leadership constantly confounded critics and ultimately caused him to be widely misunderstood by both domestic and international observers. For the first time, biographer Greg Barton delves beneath the surface and gives us a unique insight into the man and his world drawn from his long relationship with Gus Dur - including being at his side during the final extraordinary months of the presidency. Those interested in the drama of modern Indonesian politics will find this book provides a fascinating and invaluable account of the enigmatic Gus Dur.
